EXCEL 2003

Enabling Macros

2.

The screenshot shows the Microsoft Excel 2003 interface. The main window is titled "Microsoft Excel - Book1" and displays a blank spreadsheet with columns A through P and rows 1 through 49. The "Security" dialog box is open in the center, with the "Security Level" tab selected. The "Medium" option is selected and highlighted with a red box. The "OK" button is also highlighted with a red box. The "Getting Started" task pane is visible on the right side of the window.

Security

Security Level | Trusted Publishers

- Very High. Only macros installed in trusted locations will be allowed to run. All other signed and unsigned macros are disabled.
- High. Only signed macros from trusted sources will be allowed to run. Unsigned macros are automatically disabled.
- Medium. You can choose whether or not to run potentially unsafe macros.**
- Low (not recommended). You are not protected from potentially unsafe macros. Use this setting only if you have virus scanning software installed, or you have checked the safety of all documents you open.
